

Analogy

Analogy is a question of a pair of two words having a specific relationship.

The student must find the relationship of paired words, and choose the correct pair between 4 pairs (choices) which has the same relationship to the questioned pair.

To solve the question correctly:

- 1- understand the meaning of the question words**
- 2- define the relationship between the words**
- 3- choose your answer so that the relationship is the first pair of words in terms of sense order and purpose is like the relationship in the second pair of words.**

There are many relationships between analogies such as:

Analogy

Relationship	Example	Clarification
Part to all	Word: Sentence	The word is part of the sentence
